

HEADACHE AND MIGRAINE DISEASE CAN BE SEVERE

MANY PATIENTS CAN'T GET RELIEF FROM JUST A SINGLE MEDICATION.

They require multiple medications or devices — an approach called **combination therapy**.

COMBINATION THERAPY

is determined by patients and their providers.

But insurers undermine patient-provider decisions by **RESTRICTING COVERAGE.**

Insurers' coverage restrictions disregard providers' expertise and **MAY WORSEN PATIENTS' SYMPTOMS.**

Treatment decisions must remain between **PATIENTS AND THEIR PROVIDERS.**
